

About Extra Care:

- Extra Care is a housing scheme that also has a dedicated care team based on-site 24 hours a day.
- Our Extra Care apartments are aimed at older people – normally, single people and couples aged 55+; however, this can vary, depending on the development.
- Extra Care is designed to cater for a variety of older people. While there is a care team on-site, not everyone living in the scheme has to have care needs.
- People have their own apartments and tenancies, and can access flexible care and support services if they want to. They can move from needing very little or no support, safe in the knowledge that the care team will be there to support them if their needs change.
- Extra Care can support many people to live independently. The idea is that it's a home for life, but it cannot replace nursing care or offer 24-hour care.
- There are communal areas for residents, and some larger developments also have facilities for the local community.
- We work in partnership to deliver our Extra Care schemes. The housing provider delivers housing-related support and landlord duties; the care provider is commissioned through a tender process and is responsible for delivering personal care.
