

Personal Emergency Evacuation Procedures (PEEPs)

Could you evacuate yourself in an emergency?

If anyone in your household would need assistance to safely evacuate this building in an emergency, you need to inform us **as soon as possible**. We especially need to know if anyone in your home:

- has chronic or acute mobility issues
- regularly uses oxygen as a breathing aid.

By completing a quick questionnaire with your **Neighbourhood Specialist**, we can create a **Personal Emergency Evacuation Plan (PEEP)** for you, with instructions for a safe evacuation and details of any assistance we are able to provide.

We can also arrange a **Safe at Home** visit from your local Fire Service and review any adaptations you may need in your home.

Your safety is our number one priority. By keeping us updated about your personal circumstances, we can keep our buildings safe for everyone.

If you have any concerns or questions relating to Building Safety, please call us on **0300 555 0128**.

Thank you
